Calc. Max is calculated sum of CBD or THC and the amount of CBD or THC derived from CBDA or THCA, respectively.

These values are calculated by applying a molar correction factor of 0.877 to the CBDA or THCA value.

This analysis process was performed in accordance with the requirements of ISO/IEC 17025. Values reported relate only to the product tested. CR Analytical Labs makes no claims as to the efficacy, safety, or other risks associated with any detected or non-detected levels of any compound reported herein. These results relate only to the test article listed in this report. Reports may not be reproduced except in their entirety.
